

Cabot Oil & Gas Corporation

International Technology Management, LLC

**Exploration Services**

**You were not home when our surveyors stopped by.**

Due to the expanding seismic exploration of natural resources in your area, we are cataloging all buildings, water wells and septic systems to help prevent any disturbance to personal property. We would like to arrange a time that you and a surveyor can review the locations of these and any other structures and/or systems to ensure they are properly recorded and protected.

To learn more about this project and schedule an appointment, please contact us by calling **1-888-459-7803** and selecting **option 3**. Your cooperation is greatly appreciated.

**Clean Harbors Exploration Services**
